

UFO Rod and Clamp System

The Rod and Clamp assembly allows fibres and lenses to be surface mounted to a shelf or to the sides or bottom of a cabinet.

Rods are made to the customer's specified length and come as standard in black, although they and the clamps can be custom painted to a specified RAL colour if required.

The rods are typically mounted using a foot on the top or the underside of the mounting surface.

A number of lenses can be supported on one rod - the number depends on the length of the rod used. The fibre tails run separately to each lens.

Description	UFO25D & UFO26D Lens
Lens	Clear focussing lens
Material	Polycarbonate
Colours available	Black, white, chrome, ivory
Focus range	(25D) 40° - 60° (26D) 25° - 45°
Flange size	(25D) 15mm (26D) 30mm
Mounting	Screw onto ferrule
Ferrule size	M10
Min. fibre size	2mm
Max. fibre size	8mm

Description	Rod and Clamp
Material	Stainless steel / aluminium
Length	As specified by customer
Standard colour	Black
Mounting foot size	29mm high with ø25mm flange and ø13.25mm body

These assemblies are primarily used in museum or retail display cases where each lens or fibre tails can be individually angled to light up a specific item in the display case.
